

RunSoC 2.0: Scheduling and Allocating Automotive Software Tasks to Hardware Partitions in Heterogeneous MPSoCs

Performance Evaluation of the Rapid Review performed acc. to Cartaxo et al.¹:

Performance indicators for literature reviews acc. to Mourão et al.²:

$$Precision = \frac{Retrieved \cap Selected}{Retrieved}$$

$$Recall = \frac{Retrieved \cap Selected}{Selected}$$

$$F\text{-measure} = 2 \times \frac{Precision \times Recall}{Precision + Recall}$$

Performance indicators within our rapid review study:

$$Precision = \frac{21}{107} \approx 19.63\%$$

$$Recall = \frac{21}{21} = 100\%$$

$$F\text{-measure} = 2 \times \frac{19.63\% \times 100\%}{19.63\% + 100\%} \approx 32.81\%$$
